1.0	First draft	Vishal Mishra		

CONTENTS

1	OVERVIEW	4
2	Request.....	4
2.1	Request Parameters.....	5
	Sample request	5
2.2	Response Parameters	6
	Sample response data:	6

1 OVERVIEW

This document outlines the IMEI validation API and its parameters. Merchant can integrate this API and real time response from the OEM will be shared back.

2 Request

Request parameters are a collection of key-value pairs of all properties which are re-quired to be sent to Pine PG API.

Response returned is in JSON and it contains a collection of key-value pairs of properties which describes about the request sent and its status returned in this response.

Environment	URL	Calling mode
TEST	https://uat.pinepg.in:8059/api/IMEIValidation	HTTP post method("Content-Type: application/x-www-form-urlencoded")
PROD	https://pinepg.in:8098/api/IMEIValidation	HTTP post method("Content-Type: application/x-www-form-urlencoded")

2.1 Request Parameters

Key	Value	Details	M/O
PinePGTransactionId	Numeric	Pine PG transaction ID share to merchant in transaction response	M
IMEI	String	IMEI to be validated	M
TransactionType	Numeric	Following are the expected values: 1- Blocking 2-Override 3-Unblocking	M
IMEIValidationOverride	String	This is used in case IMEI validation is to be override. Reason is to be shared if TransactionType=2	
UserName	String	Not in use	M
AccessCode	String	Not in use	M

Sample request

PinePGTransactionId=229363&IMEI=334433440000552&TransactionType=1&IMEIValidationOverrideReason=&UserName=&AccessCode=

2.2 Response Parameters

Key	Value	Details
statusCode	Numeric	Success is when statuscode and errorcode is received with value 0 else failure
errorMessage	String	Error description
errorCode	Numeric	Success is when statuscode and errorcode is received with value 0 else failure
printData		Not for merchant use

Sample response data:

```
{
  "statusCode": -1,
  "errorMessage": "Transaction not eligible for validation",
  "errorCode": -6,

  "printData": "false;false,true;1;-----|false;false,true;2;IMEI VALIDATION
